

Nova Find

The leading lost & found
software in Europe.

The smart lost & found solution

In average, every 3 minutes an item is registered in Nova Find.

Nova Find, the web-based lost & found solution, fulfills all requirements of a modern lost & found service. It is based on a sophisticated search technology, a high rate of returned property, simple management of found items, reduced communication costs and a short retention times to decrease storage costs. But above all else: networked online searches in every participating database.

A woman with blonde hair, wearing a red blazer, is looking down into a red bag. The entire image is overlaid with a semi-transparent red filter. The text "There are many good reasons for Nova Find" is written in white, sans-serif font across the middle of the image.

There are many good reasons
for Nova Find

Your advantages

Nova Find is the central software solution for lost and found services.

The focus lies on high usability and user acceptance.

Automatic matching of lost and found items

Fast allocation of losses and finds - every new-found item is automatically crosschecked against every loss record.

High rate of returned items

Providing a global search by establishing a high interoperability with regional databases ensures a high rate of returned items.

Shortened storage period

The fast mediation of search results reduces the storage period of found items and thus storage costs.

Effort reduction

Lost items can be easily searched online. This significantly reduces communication effort and costs.

Compliant with local legal requirements

The legal situation with regard to find fee, finder's reward, property claims and periods for storage are observed.

Web application

Nova Find is a 24/7 SaaS solution - this eliminates operating costs, but also expenses for hardware and installation.

Multi-lingualism

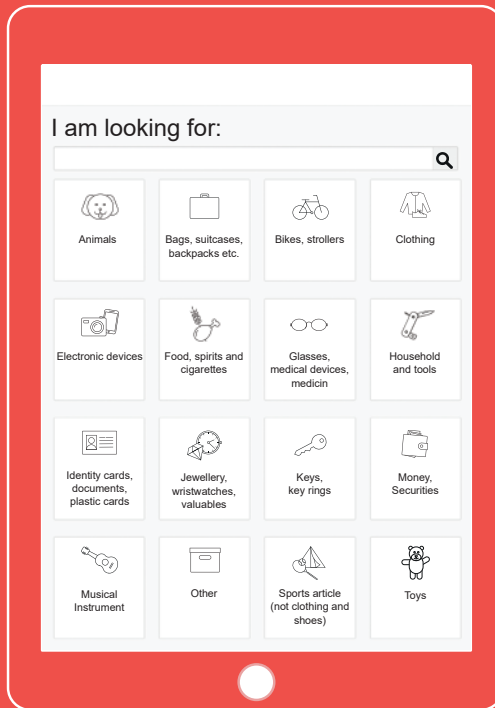

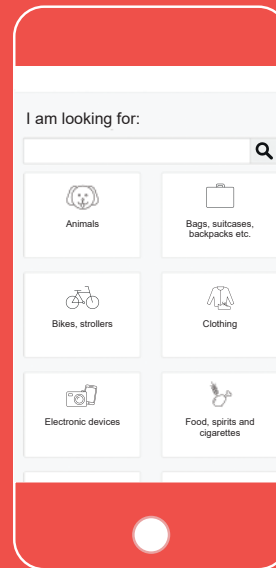

Each new found object is checked against all existing loss reports, regardless of the input language.

Mobile App

Find and loss records can also be created via mobile app, which also uses the integrated camera as a barcode scanner for storage management.

Don't search: you'll find

The central point of contact for lost items

Always and everywhere

An easy-to-use, barrier-free web platform is available for searching for lost and found items – 24/7/365 and via any end device. A loss record is automatically compared with all existing find records.

Fast

It only takes a few minutes to create a loss record: By means of numerous criteria (e.g. colour, brand) the lost object can be described exactly. The hit list is weighted according to the items matched.

Successful

The search takes lost items from all participating regions and organizations (e.g. public transport companies) into account and significantly increases the hit rate. The protracted search in numerous lost & found offices finally comes to an end with Nova Find.

The solution for digital lost & found offices

All features

Recording

Lost and found items are recorded via online application or mobile app. An input mask with selection categories enables a standardized recording of found objects.

Predefined correspondence

Notifications and confirmations can be easily created. Employees do not need to transfer data manually, nor do they need to worry about wording.

Storage management

Numerous database entries can be processed simultaneously for transfers to other locations. Destruction or recycling enables efficient storage management. Optional barcodes allow to identify the item much easier.

Design

Nova Find offers numerous possibilities to design the public search interface and integrated document template management. These can be created according to the corporate design.

Historization

Complete data historization guarantees high transparency and traceability of every process for the lost and found service.

Configuration

Depending on local law and regulations (e.g. instructions, fees, deadlines), the software offers numerous configuration options.

Smart user management

Employee-specific roles and rights can be assigned to operate Nova Find.

Statistics & evaluations

Current key figures on items and records can be downloaded at any time.

easyfind

The perfect complement
to Nova Find

You'll like it

easyfind codes ensure that lost and forgotten items are quickly and easily returned. Items of any kind can be marked anonymously with easyfind codes. In case of a find the owner will be informed automatically via Nova Find or www.easyfind.com.

The benefits of easyfind accessoires

easyfind accessoires are available in numerous variants, colours and shapes.

- ✦ **Useful:** With easyfind accessoires lost items get back to their owner. This saves time, money and reduces stress.
- ✦ **Emotional:** Getting back personal property turns into a positive experience.
- ✦ **Versatile in use:** easyfind accessoires are small, lightweight and cheap – therefore perfect for mailings and events of all kinds.
