

Number 1 in Europe: The Nova Find Funds Service Network

The Nova Find lost property software provides up-to-date and DSGVO-compliant service at the highest level. Thanks to the wide reach of the network, more than 30 million citizens are served.

THE COMPLETE SOLUTION FOR YOUR DIGITAL LOST PROPERTY OFFICE

Nova Find is a software-as-a-service solution. All phases of a find or loss can be handled digitally. The reporting of the found or lost property, all processes in the lost property office and the return of the found property - up-to-date and DSGVO-compliant.

AUTOMATIC MATCHMAKING

Every new found object is automatically cross-checked with all lost property reports. In the process, each individual search request on each search portal is matched with all participating lost property offices.

On average, a found object is recorded every 30 seconds. Nova Find, the state-of-the-art lost property solution, meets all the requirements of a modern lost property system: sophisticated search technology, high return rate, simple management of found objects, reduced communication costs and short storage times to reduce storage costs. But above all, networked online search in all participating databases.

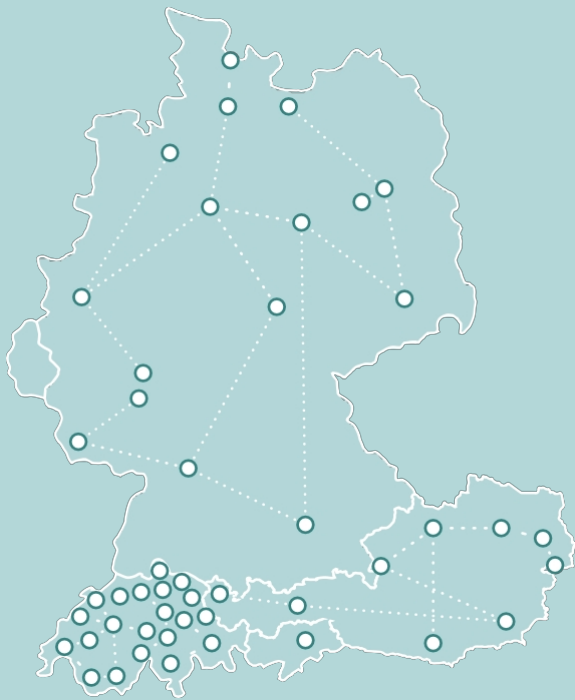

HIGHER RETURN RATE DUE TO SUPRAREGIONAL SEARCH

By extending the hit matching to the supra-regional database, the return rate is significantly increased. The high hit rate leads to a shorter retention period and enables rapid placement with the owner.

EFFORT REDUCTION

Lost items can simply be searched for online. Thanks to Nova Find, communication effort and costs are thus significantly reduced.

Dissemination of the RUBICON Fund Solution

WITH INTELLIGENT ALGORITHM FASTER TO THE TARGET

Nova Find convinces with a high hit rate thanks to its intelligent algorithm. A fast allocation of finds and losses is thus possible regardless of opening hours.

The data from the

The loss report can be automatically transferred to the lost property report, so that data does not have to be transcribed manually.

DSGVO AND LEGALLY COMPLIANT

Nova Find takes into account the current legal situation regarding lost property fees, finder's compensation, ownership claims and retention periods. Requests for deletion within the framework of the German Data Protection Act (DSGVO) are also possible with just a few clicks. Configurable deadlines control the automated blackening and deletion of personal data. Required notifications are created and sent on time.

SHORTENED RETENTION PERIOD

The rapid mediation of finds reduces the storage period of found objects and thus storage costs. The current regulations on the storage of finds are complied with as a matter of course.

MULTILINGUALISM

Each new found object is cross-checked with all existing loss reports, regardless of the input language.

ONLINE SEARCH FOR CITIZENS

An easy-to-use, barrier-free mask is available online for searching for lost objects.

Always and everywhere:

The Nova Find online search is available around the clock and on any device. If the item is not yet listed, a loss report can be submitted immediately.

Quickly:

It only takes a few minutes to create a loss report: Using numerous criteria (e.g. colour, brand), the lost item can be described precisely. The loser receives a hit list weighted by match.

Successful:

The search takes into account found objects from all participating regions and companies (e.g. transport companies) and significantly increases the hit rate. Nova Find finally puts an end to the tedious search in numerous lost property offices.
